Not a significant source of dietary fiber, added sugars, <i>trans</i> fat, cholesterol, Vitamin D, calcium, iron, potassium.	
*The % Daily Value (DV) tells you how much a nutrient in a serving of food contributes to a daily diet. 2,000 calories a day is used for general nutrition advice.	

Feeding Instructions | *For enteral or oral use only*

- Remove vial from refrigerator or freezer. Please note: Contents may appear separated; this is normal.
- Hold the vial in a closed hand for approximately 30 seconds or until warmed.
- Holding the vial horizontally, roll between palms of hands for 30 seconds to mix thoroughly.
- Remove cap and rubber stopper.
- Place syringe into vial and draw up 0.5ml.
- Dispense mixture into port of infant's enteral feeding tube.
- Flush immediately and dispose of syringe and vial per hospital policy.
